Article 3. Registration on the website and the use

3.1 By registration on the website a user is able to follow the progress of auctions on the website. The user agreement is not transferable. By registration the user provides his personal details to Industrial Auctions and chooses his own password to access the website. The client's account and the associated password are strictly personal and may not be transferred by the client to a third party. The client must immediately inform Industrial Auctions if there is any suspicion that their password is known by a third party. Further access to the website will then be disabled to avoid any misuse.

3.2 Industrial Auctions confirms the registration by e-mail to the user on the specified e-mail address, after which user can gain access to the auction by using his chosen password. User is obliged to behave after granted access to the website and do not inflict damage to the website or to other users. User is liable for all activities that occur on the website after that access has been gained by using the password of user.

3.3 The client is responsible for the correctness and completeness of the personal data provided at the time of registration with Industrial Auctions. The client must immediately inform Industrial Auctions of any change to this personal data. Any bids submitted through the client's account will be regarded as being bids

made by, or on behalf of, the client themselves. The client is personally liable for the fulfillment of the obligations arising from the submission of any bid even if the bid is made as a result of the misuse of the client's account and/or password.

3.4 Industrial Auctions reserves the right to refuse registration and to terminate unilaterally, without giving a reason.

3.5 Industrial Auctions takes obtained personal data in records kept for that purpose. Through registration on the website, the user gives consent to the use and the storage and processing of the personal data recorded.

3.6 Clients are prohibited from reproducing or making available any part of the Industrial Auctions website (through deeplinking or otherwise) without prior written permission from Industrial Auctions. All associated Intellectual property is reserved to Industrial Auctions.

3.8 Laws and regulations may impose (additional) obligations on Industrial Auctions, such as, for example, the Money Laundering and Terrorist Financing (Prevention) Act. At the same time, Industrial Auctions may also require further information. If in the opinion of Industrial Auctions any form of (client) research or information is desirable, user is obliged to provide all requested information upon first request. User is obligated to provide all information that Industrial Auctions (reasonably) requests by return, with underlying verifying data or records. This may include (but is not limited to): information about the client's identity and to further establish or verify this, to verify and establish the identity of the beneficial owner, to gather information about third parties (with whom the client has or is suspected to have ties), the purpose and nature of the assignment or transaction or to be able to exercise ongoing control over the business relationship or the natural person representing the client, or the person who is authorised to do so and whether the client is acting on their own behalf or on behalf of someone else. For example, to verify the identity of the user. If the user is a legal entity (such as a limited liability company or general partnership), Industrial Auctions may request to determine the ultimate beneficiaries or 'Ultimate Beneficial Owner' (UBO) and require data to be provided for that purpose. In the absence of delivery of the requested information and verifiable data or documents within 5 days after the initial request, Industrial Auctions may terminate the agreement immediately. Pending receipt of the data, Industrial Auctions may suspend or refuse to provide services. Industrial Auctions is not obliged or liable to pay compensation for damages.

Article 4. The auction

4.1 Industrial Auctions reserves the right to cancel an auction earlier than reported on the website or to extend one. In case of a technical malfunction of the website, causing it not complete and/or inaccessible to all users, Industrial Auctions reserves the right to extend the auction.

4.2 The effectiveness of the internet and its website depends on many factors and many others. Industrial Auctions is not in control of many factors and can accept no liability for things they are not in control of. User and seller declare themselves familiar with and agree with the special circumstances of an internet auction and with the technical imperfections that can arise. Industrial Auctions must therefore limit its liability. For example, it may involve downtime, interruptions, delays in the connection, maintenance, updates, viruses, limited accessibility, et cetera et cetera. Industrial Auctions is not liable for any damage that might result therefrom.

4.3 Industrial Auctions hereby exclude to both the user and the seller any liability for any damage directly and/or indirectly, in any way arise, including but not limited to the damage arising from the use of the website, unless there is intent or willful recklessness of Industrial Auctions.

4.4 Industrial Auctions also accepts no liability for any damage whatsoever that arises in any way by and/or arising from:

- Actions by the user that may have been prompted by information placed on the website;
- The impossibility of using the website (completely) and/or another malfunction in the website or the

supporting system;

- The failure of the lots to the specifications as reported on the website;
- The fact that the information on the website is incorrect, incomplete or out of date;
- Errors in the software and/or the supporting system of the website;
- The unlawful use of systems, including the website of Industrial Auctions by a third party;
- Acts of the seller after the user has concluded a purchase agreement;

4.5 Industrial Auctions organizes online auctions on behalf of sellers. She does not sell own products. Industrial Auctions reserves the right to cancel an auction, earlier than reported on the website, or to extend one.

Article 5. Security

5.1 Industrial Auctions strives to secure its systems against loss of data and/or any form of unlawful use and takes appropriate technical and organizational measures, including taking into account the state of the technology.

5.2 Industrial Auctions is not liable for loss of data, damage to files, unlawful access to computers or files, viruses spread via the website or other unlawful programs or files or any other consequence of the use made of the website.

5.3 The website may contain links to other websites. Industrial Auctions has no control over such sites and is not responsible for the content of those sites.

Article 6. Description lots

6.1 Industrial Auctions and the person on whose behalf the lot will be auctioned strive to achieve the greatest possible accuracy and clarity of the description of a lot on the website, auction catalogs, other auction brochures, advertisements and such, without any liability for damages arising from incorrect or incomplete descriptions or other damage.

6.2 Pipes, cables and/or other connections for energy, control or production that are located on/in a lot are to be, unless expressly stated in the Specific Online Auction Terms and Conditions stated, only sold to the first valve, fitting or applied mark. Underground or built-in connections never are part of the lot, unless explicitly stated otherwise in the Specific Online Auction Terms and Conditions.

Article 7. Adjustments; operation

7.1 If and insofar as any clause of these General Terms and Conditions is invalid or unenforceable, the remaining clauses of these General Terms and Conditions will remain valid. Industrial Auctions will then adopt a new clause to replace the invalid/annulled clause, as far as possible the scope of the invalid/annulled clause shall be respected.

7.2 Industrial Auctions can, in addition to these General Terms and Conditions, declare the Specific Online Auction Terms and Conditions applicable. They are therefore already accepted by the user. In case of contradiction prevails the clause of the Specific Online Auction Terms and Conditions over the clause in these General Terms and Conditions.

7.3 The present General Terms and Conditions may be deviated only when this is stipulated in writing by an authorized representative of Industrial Auctions.

7.4 Industrial Auctions reserves the right to modify these General Terms and Conditions. Changes take effect 24 hours after an e-mail is communicated to the user or if they (digital) have been accepted comes into effect.

Article 8. Auction organization by Industrial Auctions

8.1 The organization, preparation and execution of the auction lie with Industrial Auctions.

8.2 Industrial Auctions has the authority before, during or after the auction without assigning any reasons:

- Not to recognize a bid as such;

- To exclude one or more users from the auction;
- To consolidate articles into lots, to split lots and take lots from the auction;
- To repair mistakes made by Industrial Auctions in bids and/or allocations, without a user is able to make use of these errors and/or derive any rights from them;
- Lots whether or not to allocate;
- To implement other, in the opinion of Industrial Auctions, useful or necessary measures or changes;

8.3 Industrial Auctions is authorized before participation in certain auctions and/or bids on certain lots to require prior, from the user, a bank guarantee or other form of security to the choice and satisfaction of Industrial Auctions (to be judged by Industrial Auctions)

8.4 The judgment of Industrial Auctions concerning what has taken place before, during or after the auction, is binding.

Article 9. Bid; Purchase Agreement

9.1 The user can place a bid on the website on one or more lots. Every bid is unconditional, irrevocable and without reservation. Industrial Auctions and/or the seller is/are entitled, without giving any reason not to accept bids. Bids are placed exclusive buyers premium and VAT. Industrial Auctions is authorized to place bids on behalf of third parties.

9.2 If a lot is accompanied by one or several other lots as a combination in auction this shall be indicated on the page of the individual lot. In that case, there can be placed bids first on the individual lots of the combination and after the closing of all individual lots, offered on the combined lot. Individual lots can be allocated only if the total amount of the highest sustainable bids on the individual lots is higher than the highest sustainable bid on the combination. The combination will be allocated solely if the highest sustainable bid on the combination is higher than the total amount of the highest sustainable bids on the individual lots.

9.3 Bids can be placed in the form of a "static bid" or a "proxy bid". In a static bid, the user places a bid in the form of a fixed amount per lot. In a proxy bid the user indicates the maximum price he is willing to pay for the lot. The auction system then ensures that, after outbidding by a third party, in the name of the user, the minimally possible higher bid is introduced, as long as the maximum indicated by the user has not been reached. A proxy bid can only be disabled by the user by placing a static bid that at that moment is the highest bid.

9.4 The purchase agreement arises through allocation. Allocation is generally given to the user who has made the highest bid. By applying the clause of article 9.1, through conditions for allocation as included in the Specific Online Auction Terms and Conditions or for other reasons at the discretion of Industrial Auctions may be allocated to a different user than the user who has placed the highest sustainable bid instead.

9.5 The buyer will get within 48 hours after the auction has been closed, at least as quickly as possible (Saturday, Sunday and holidays not included) confirmed by e-mail on behalf of the seller(s) that the purchase agreement has been concluded. If the user does not get an e-mail within the period mentioned above, this means that his bid has not been allocated. Industrial Auctions reserves the right not to allocate or to allocate under suspensive condition(s).

9.6 The risk of the lot(s) is transferred from the seller to the buyer at the moment of allocation. The seller is up to the allocation obliged to properly insure the goods and maintain properly insured against fire, explosion and water damage and theft. Seller is also obliged to take out adequate insurance and liability insurance and maintain so. The policies and the proof of premium payment of these insurances (or at least copies of them) must be provided by seller on first request to Industrial Auctions.

9.7 Industrial Auctions is not a party to the purchase agreement but merely mediates in the creation of purchase agreements between buyer and seller. Its content is always precisely defined. Seller and buyer realize there on the part of Industrial Auctions may involve a conflict of interest. Buyer and seller hereby give permission to Industrial Auctions for simultaneously serving (the interests of) the buyer and seller.

9.8 If there is a forced sale, this will be stated in the Specific Online Auction Terms and Conditions.

9.9 In the event seller is a trustee in his capacity as receiver, article 7:19 Civil Code applies.

9.10 If the auction takes place in the presence of a notary or bailiff, he will supervise the auction and the bids placed there and allocations.

Article 10. Guarantees, claims and indemnities

10.1 Industrial Auctions sells third party products, for third parties. Seller and buyer realize that Industrial Auctions is unaware or may be of the nature, condition or similar of the sold. Industrial Auctions and/or the seller provide regarding the lots and possible claims of third parties to these, no warranties of any kind. Buyer waives all rights which do not belong to the buyer under mandatory law.

10.2 The lots are sold in the state in which they exist on the date of allocation with all its possible defects, benefits and burdens. Industrial Auctions and/or seller give in no indemnity for visible or hidden defects or warranty in connection with completeness, numbers, functioning, usability, saleability, the existence or absence of rights or claims of third parties and or the possibility of transfer to third parties. Defects of whatever kind, disappointed expectations of the buyer and/or receiving third parties do not provide any entitlement to (damage) compensation and/or settlement and/or suspension. The buyer shall be deemed to have carefully examined the lot bought by him beforehand.
